

Systems Administrator (Graduate)

About

Quorate Technology is a specialist developer of high-performance, custom-built Automatic Speech Recognition systems for parliaments and news organisations around the world. Quorate is an employee-owned company that was formed in 2012 as a spin-out from the world-leading Centre for Speech Technology Research at The University of Edinburgh. We are a friendly, relaxed and sociable team who help each other, whilst being highly professional, client-focussed and passionate about what we do.

Opportunity

We are now looking to recruit a graduate level Systems Administrator to take responsibility for the day-to-day support and maintenance of our Linux (Ubuntu) based computing infrastructure. This includes desktop PCs, GPU and HPC servers, storage servers, networking and back-up systems. Whilst the infrastructure is currently hosted on-premises, we intend to transition to using AWS as the primary hosting platform.

You will perform a vital role within the business. Reporting to our Lead System Administrator, you will be responsible for providing support and maintenance of the systems used by our team of speech scientists and platform engineers, as well as contributing to the migration to AWS.

Responsibilities

You will be responsible for:

- Providing user support
- Troubleshooting and problem solving
- Managing configuration changes
- Carrying out systems automation and integration
- Ensuring timely and successful firmware and software upgrades
- Installations and replacements
- Liaising with suppliers and partners

- Suggesting improvements
- Contributing to the company's strategy

What we offer:

We will provide you with:

- A collegial and entrepreneurial working environment
- Real responsibility
- On the job support, training and learning
- External courses and certifications
- Competitive salary
- Share options
- Pension contributions
- Cycle to Work Scheme
- Plenty to do.

Key Requirements

You must have:

- A degree in Computer Science and/or considerable, relevant work experience
- Excellent written and verbal communication and interpersonal skills
- Knowledge of information security and privacy best practices
- The ability to work effectively in a team environment
- Patience, resilience and the ability to work under pressure
- The desire to learn and keep up to date with the latest technological advancements

Experience with some or all of the following would be desirable:

- Systems administration
- Python/Shell scripting
- Desktop and server hardware build and or support experience
- Proficiency in software development (Python / C++ / Java)
- Back-up and recovery systems
- Ansible or other infrastructure automation tools
- TCP/IP networking
- LDAP/Active Directory
- Networked file systems (NFS, Samba, etc.)
- Web and FTP server administration
- HPC software (SGE or similar)
- Amazon Web Services (AWS)

How to Apply

Please contact info+sysadmin@quoratetechnology.com with your CV and covering letter.

Thank you!
